DETAILED ACTION

EXAMINER'S AMENDMENT

The application has been amended as follows:

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

For claim 14, delete the text "(Previously Presented)" in line 1 of the claim and replace with the text "(Currently Amended)".

For claim 21, delete the text "(Previously Presented)" in line 1 of the claim and replace with the text "(Currently Amended)".

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

1. **Claims 1-5, 12-14 and 18-29 are allowed.**

Claim 1 is limited to "a system for attenuating leakage signals in a communication system." Claim 5 has been currently amended such that the previous "plurality of communication connections" are more specifically defined as a "a plurality of subscriber loops." While Nakano discloses general "connections," Nakano is clearly not

directed towards more than one subscriber loop. Instead Nakano includes a single subscriber loop input to NTE (6). Thus, claim 5 is allowable over Nakano.

Claims 2-4, 12-14, 18-20 and 23 are dependent on claim 1, and thus, are allowable over Nakano for at least the same reasons.

Claim 5 is limited to “a method for shunting leakage signals in a communication system.” Claim 5 has been currently amended such that the previous “tip connection and ring connection” are more specifically defined as a “tip and ring connection in a plurality of subscriber loops.” As Nakano is clearly not directed towards more than one subscriber loop, claim 5 is allowable over Nakano.

Claims 24-26 and 29 are dependent on claim 5, and thus, are allowable over Nakano for at least the same reasons.

Claim 21 is limited to “a system for shunting leakage signals in a communication system.” Claim 21 has been currently amended such that the previous “tip connection and ring connection” are more specifically defined as a “tip and ring connection in a plurality of subscriber loops.” As Nakano is clearly not directed towards more than one subscriber loop, claim 21 is allowable over Nakano.

Claims 22, 27 and 28 are dependent on claim 21, and thus, are allowable over Nakano for at least the same reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
